The new Concept-EP Alièn transmutes the reality into a vision, while the sounds merge present and future matter. A point of view about the world taken for granted, which lost its roots.

The Singer/Songwriter/Composer Francesca Monte gives herself up to a superior power, exploring her inner self.

Alièn is a journey through space and time and the remotest places of our soul.

Alièn is composed by Francesca Monte with the precious contribution of Tremila, who took care of the album's artwork and lettering.

This EP is accompanied by a short film directed by Paolo Hanzo, that mixes visual arts with fashion design: the costumes are unique and designed by emerging artists coming from Italy and the UK (Istituto Marangoni London).

Ermes De Cristofaro took care of Francesca's image, paying attention to every detail, choosing sustainable fashion and focusing on gender-fluid outfits.

Precious is the contribution of Tremila, creator of the album's cover art and lettering.

Martino Prendini is responsible for the short film's illustrations and 2D animations.

Fabrizio Todisco is the creative manager and location manager for the short-film.
